The Biggest  
Cadaver & Live Surgical  
Workshop on Minimally  
Invasive Spine

# *Message From Organising Committee*

Dear Colleagues

## **Welcome to 3<sup>rd</sup> MISSAB Annual Cadaver & Live Surgical Course**

This course presents unique opportunities to learn Minimally Invasive Spine (MIS) surgeries for young surgeons in training as well as those who want to extend into advanced techniques. The course is designed to present both basic and advanced techniques and practice on the cadaver under the expert guidance of renowned International and National faculty. It is hoped that the interactive sessions will generate sufficient discussion to promote safe MIS. At the end of the course, the participant is expected to understand the principles of MIS surgery and will be able to use these principles in their practice.

Thank You

**Dr. Rajakumar Deshpande, M.Ch.**  
*Organising Chairman*
